

MINDORO'S BATANGAS PROJECTS

> 29,000 Ha With Gold Resources & Porphyry Copper-Gold Prospects

MINDORO
RESOURCES LTD.

Freeport McMoRan's Taysan porphyry copper-gold deposit

Talahib
 · reconnaissance work located a high-grade copper-mineralized outcrop
 · believed related to porphyry copper-gold system

Calo
 Hole 7: clasts of potassic-altered diorite with trace to 1% chalcopyrite

El Paso
 · cluster of porphyry copper-gold targets
 · multi-phase intrusives with high-chargeability-high resistivity anomalies

Marita-Kalabasa-Bootin
 · porphyry copper-gold targets

Pica
 · porphyry copper-gold system
 · Hole 2: 213 m @ 0.18 % Cu
 0.30 g/t Au
 1.19 g/t Ag

SW Breccia Resource
Indicated
 270,000 t @ 6.49 g/t Au; 56,380 ozs Au
Inferred
 61,000 t @ 5.35 g/t Au; 10,540 ozs Au
 Open to SW and depth

Initial Kay Tanda Resource
Indicated:
 3,365,000 t @ 0.88 g/t Au; 95,000 ozs Au
Inferred:
 11,599,000 t @ 0.70 g/t Au; 262,000 ozs Au
 Open in several directions

- Mindoro tenements / applications
- Freeport McMoRan
- Porphyry copper-gold prospects defined by chargeability / alteration / copper showings
- Resource area
- Epithermal vein-breccia trends / prospects (gold – silver - copper)
- Copper showing
- Historical mine / workings
- Other prospects [not yet evaluated]
- Road
- See inset map
