

LOBO PROJECT - Mapping and Sampling, July 2002

**Major vein system defined;
drilling early 2003**

Rock sampling:

- widely-distributed
- high values (gold & silver reported in grams per tonne; copper in %)

Two major veins:

- each over 2 km long
- old records indicate widths to 20 m

LEGEND

- River/Creek
- Mapped / probable / inferred vein
- Adit / Old mine workings
- Float grab sample
- Outcrop rock chip sample
- Channel sample

3.36 Au Gold g/t
114.4 Ag Silver g/t
1.58 Cu Copper %

Only results above 0.5 g/t Au 5 g/t Ag & 0.5% Cu shown,
